1. [REDACTED] Comment: The entraining involved elements of the 124th HV How Arty Brig (US) and corresponds to observations in 1952, according to which, also beginning in mid-May, the brigade, presumably on battery level, continually conducted firing practices at Altengrabow. It is believed that only individual 122-mm or 152-mm howitzers are assigned to the brigade for training purposes. See [REDACTED]
